ERP Module & Data Status

Module-by-module review: which modules are empty (free), where data is filled vs. not, and where the data is correct vs. demo/test — across the whole ERP.

Modules reviewed: 57 (plus dashboards & views)

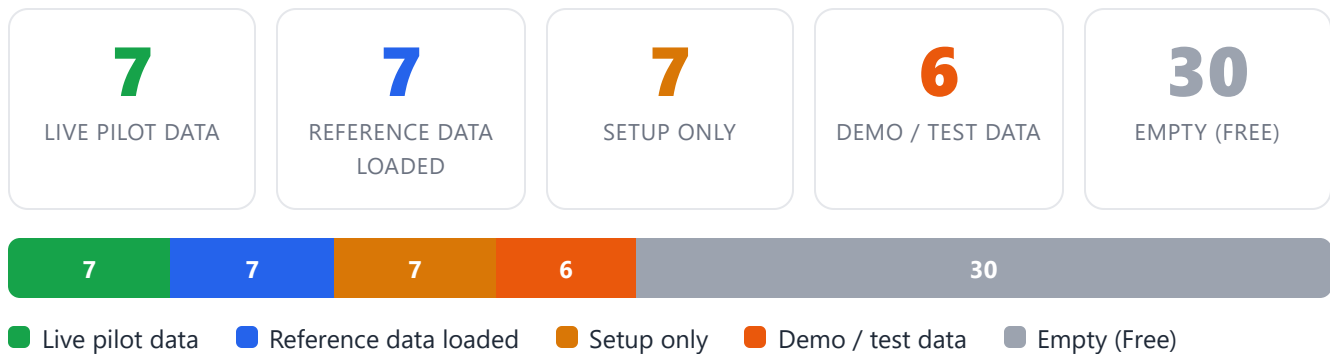

Source: Live database snapshot — data/erp.db (read-only)

Snapshot taken: 2026-06-27 06:45 · **No code or data changed**

Prepared: 2026-06-27

1. Executive Summary

The ERP is **fully built and configured**, but in terms of **data** it is still a **pilot**. The picture across all 57 modules is:

The three questions, answered

- **Which modules are free (empty)?** The majority. Almost every *transactional* module — Quotations, Cheques, Payables, Collections, Invoices, Expenses, Sales Billing, all Hiring/Payroll, all Solar deals, Complaints, Snags, Tools, Rentals, Assets and more — currently holds **no records**. They are ready for real data.
- **Where is data filled?** Mainly the **master / reference lists** (Items 2,394; Price Breakup 630; Labour Rate 610; Solar masters; Roles & Permissions) and a few **live pilot** areas (Business Book, CRM Sales Funnel, Indents, Procurement Schedule, Sub-contractor Master, Audit Log).
- **Where is data correct vs. not?** The masters and live pilot data are **correct**. The risk is the **demo / test data** sitting in 6 modules (Delegations, Vendors, DPR, Attendance, Cash Flow, Performance) — this is seeded sample data and **must be cleared before go-live** so management is never shown fake numbers.

One-line takeaway: The system is real; most modules are empty and waiting for live data; the masters are good; and a handful of modules contain demo data that should be wiped before the rollout.

2. How to read this report

Every module is tagged with one status. The **Records** column is the live row-count from the database. **Filled?** and **Correct?** summarise the two questions at a glance.

Status	Means "filled?"	What it tells you
Live pilot data	Yes	Real records are being created and processed here (pilot usage).
Reference data loaded	Yes	The module's reference/master list is loaded and looks correct.
Setup only	Partial	Setup/config rows exist, but no live transactions yet.
Demo / test data	Demo	Contains seeded sample/test data — not real, clear before go-live.
Empty (Free)	No	No data at all — the module is free and ready for real entry.

3. Module-by-module status

CRM

Module	Records	Filled?	Correct?	Status	What's in it / what to do
Partners (Influencers)	0	No	—	Empty (Free)	No partners entered yet.
CRM Sales Funnel	3	Yes	✓ Good	Live pilot data	Real leads in flight; none closed yet (no win/loss set) — expected for an open funnel.
Sales Funnel (Leads)	0	No	—	Empty (Free)	The 7-stage sales funnel has no leads.
Business Book	13	Yes	✓ Good	Live pilot data	Booked-order ledger in use; the cleanest live dataset.
Customers	0	No	—	Empty (Free)	Customer master unused — the funnel keeps its own client fields for now.
Full Kitting	0	Partial	● Config	Setup only	Checklist template configured (131 checkpoints) but no kitting entries recorded.

Solar Division

Module	Records	Filled?	Correct?	Status	What's in it / what to do
Solar Sales Funnel	0	No	—	Empty (Free)	No solar deals created.
Solar Quotation	0	No	—	Empty (Free)	No solar quotations.
Solar Projects	0	No	—	Empty (Free)	No solar projects.
Solar Material Master	59	Yes	✓ Good	Reference data loaded	Material rate master loaded & correct.
Solar Labour Master	6	Yes	✓ Good	Reference data loaded	Labour rate master loaded.
Solar Settings	26	Yes	✓ Good	Reference data loaded	Factors / settings configured.

Quotes & Orders

Module	Records	Filled?	Correct?	Status	What's in it / what to do
Quotations	0	No	—	Empty (Free)	No quotations raised.
AI Auto-Quotation	0	No	—	Empty (Free)	Estimator unused so far.
Price Breakup Master	630	Yes	✓ Good	Reference data loaded	Rate + labour + FOC breakup master fully populated & approved.
Labour Rate	610	Yes	✓ Good	Reference data loaded	Labour rate card loaded & correct.

Procurement

Module	Records	Filled?	Correct?	Status	What's in it / what to do
Items	2,394	Yes	✓ Good	Reference data loaded	Largest, cleanest master — every item approved; only 3 of 2,394 lack a price.
RFQ Queue	0	No	—	Empty (Free)	No price requests in the queue.
Vendors	1	Demo	⚠ Clear it	Demo / test data	Only one vendor exists — "Test Vendor PMT". A real vendor master is required.
Indent to Dispatch	11	Yes	✓ Good	Live pilot data	Pilot indents flowing; 6 of 11 still "submitted", 3 POs raised, 0 dispatched (no delivery notes yet).
Order to Planning	10	Yes	✓ Good	Live pilot data	Planning rows present (older, Apr-2026); tied to 10 sites.
Schedule (Gantt)	12	Yes	✓ Good	Live pilot data	Backward-pass schedule generated; phase rules configured.

Projects

Module	Records	Filled?	Correct?	Status	What's in it / what to do
Indent Labour Payment	0	No	—	Empty (Free)	No labour-payment indents.
Daily Reports (DPR)	3	Demo	⚠ Clear it	Demo / test data	Only 3 header rows and they have NO manpower / material / machinery / work-item lines — demo stubs, not real reports.
Snags	0	No	—	Empty (Free)	No snags logged.
Fire NOC Renewal	0	Partial	⚙ Config	Setup only	State renewal-cycle rules seeded (9); no properties tracked yet.
Sales Billing	0	No	—	Empty (Free)	No sales bills / installations.

Finance

Module	Records	Filled?	Correct?	Status	What's in it / what to do
Cheques	0	No	—	Empty (Free)	No cheques recorded.
Payables	0	No	—	Empty (Free)	No payment requests — note this is the live RACI/SLA pilot screen, just unused so far.
Collections	0	No	—	Empty (Free)	No receivables / collections.
Invoices	0	No	—	Empty (Free)	No invoices.

Module	Records	Filled?	Correct?	Status	What's in it / what to do
Cash Flow	5	Demo	⚠ Clear it	Demo / test data	Daily rows exist but every figure is zero — auto-created by the cron, no real cash entered.
AR/AP Tracker	0	No	—	Empty (Free)	Forecast grid empty.
Expenses	0	No	—	Empty (Free)	No expenses booked.

HRMS

Module	Records	Filled?	Correct?	Status	What's in it / what to do
Hiring	0	No	—	Empty (Free)	No candidates / requisitions.
Sub-contractor Hiring	0	No	—	Empty (Free)	14-step tracker unused.
Onboarding	0	Partial	⚙ Config	Setup only	Induction checklist seeded (5 items); no one onboarded.
Training	0	No	—	Empty (Free)	No training content / assignments.
Attendance	7	Demo	⚠ Clear it	Demo / test data	Only Admin + Backup-Admin, auto-marked with blank punch times — not real attendance.
Payroll	0	Partial	⚙ Config	Setup only	Settings configured; no payroll run processed.
Employees	0	No	—	Empty (Free)	Employee master is EMPTY — people currently live only as 11 login "users".
Performance (Scorecard)	40	Demo	⚠ Clear it	Demo / test data	KPI templates real (232 KPIs) but the 40 score entries are seeded for 8 sample employees.
Champions League	0	Partial	⚙ Config	Setup only	Teams + members built (2 teams, 9 members); no award cycle has been run.
Sub-contractor Master	4	Yes	✓ Good	Live pilot data	4 sub-contractors registered.

Inventory

Module	Records	Filled?	Correct?	Status	What's in it / what to do
Tool Rentals	0	No	—	Empty (Free)	No rental enquiries.
Assets	0	No	—	Empty (Free)	No company assets registered.
Inventory	0	Partial	⚙ Config	Setup only	7 warehouses + 1 opening balance seeded; no stock movement.
Tools	0	No	—	Empty (Free)	Tool register empty.
Room Rentals	0	No	—	Empty (Free)	No properties / rooms.

Tasks

Module	Records	Filled?	Correct?	Status	What's in it / what to do
Delegations	200	Demo	⚠ Clear it	Demo / test data	All 200 rows are literally titled "Demo task", all "approved", 25 each to 8 sample staff, 40 future-dated — pure seed data.
PMS Tasks	0	No	—	Empty (Free)	No PMS tasks.
Checklists	0	No	—	Empty (Free)	No checklists defined.

Service Desk

Module	Records	Filled?	Correct?	Status	What's in it / what to do
Complaints	0	No	—	Empty (Free)	No complaints logged.
Help Tickets	0	No	—	Empty (Free)	No help tickets.

System / Admin

Module	Records	Filled?	Correct?	Status	What's in it / what to do
Users	11	Partial	⚙ Config	Setup only	11 accounts — but 8 are sample people (Asha...Hari) used for demos; 2 admins + 1 disabled auditor are real.
Roles & Permissions	625	Yes	✓ Good	Reference data loaded	12 roles, 625 permission grants — correctly configured.
Audit Log	278	Yes	✓ Good	Live pilot data	278 entries — the audit trail is genuinely recording activity.
Dashboards (War Room / Console / TOC)	—	—	—	Read-only view	Read-only roll-ups; they show whatever the source modules hold (mostly empty today).

4. Data-correctness action list

These 6 modules are **filled but with demo / test data**. Recommended action: clear (or replace with real records) before the management rollout, so no fake figures are ever shown.

Module	Why it is flagged
Vendors	Only one vendor exists — "Test Vendor PMT". A real vendor master is required.
Daily Reports (DPR)	Only 3 header rows and they have NO manpower / material / machinery / work-item lines — demo stubs, not real reports.
Cash Flow	Daily rows exist but every figure is zero — auto-created by the cron, no real cash entered.
Attendance	Only Admin + Backup-Admin, auto-marked with blank punch times — not real attendance.
Performance (Scorecard)	KPI templates real (232 KPIs) but the 40 score entries are seeded for 8 sample employees.
Delegations	All 200 rows are literally titled "Demo task", all "approved", 25 each to 8 sample staff, 40 future-dated — pure seed data.

Also worth noting: the **Employees** master is empty — staff currently exist only as 11 login users (8 of them sample people). Before HR/Payroll/Attendance go live, real employees should be created so those modules have a correct people master to point at.

5. Method & caveats

- **Source:** a direct, read-only snapshot of the live database (data/erp.db) at 2026-06-27 06:45. Nothing was written; no ERP code was changed.
- **"Records"** = exact row count of the module's main table(s) at snapshot time.
- **"Correct?"** is a data-quality judgement (completeness, demo-markers, orphan references), not an audit of every field. "Demo / test data" means rows that are clearly seeded — e.g. titles like "Demo task", a single "Test Vendor", header-only DPRs, or all-zero auto-generated cash rows.
- **Scope:** data presence & quality only. Whether each *screen/feature works* is a separate question — every module here is built and reachable; this report is purely about the data inside them.
- The internal chat (SOTYN Chat) lives in a separate database (data/chat.db) and is outside this data review.
